

TripleCross - Intermediate Puzzle #51

This puzzle is like a crossword, but with numbers. Each digit occupies a hexagonal cell and can be a part of a "word" in the across, up, and down directions.

Rules:

- 1. "Words" may not start with a zero.
- 2. "Words" in the 'across' direction read from left to right.
- 3. "Words" in the 'up' direction read along the upward diagonal to the right.
- 4. "Words" in the 'down' direction read along the downward diagonal to the right.
- 5. There is one unique solution which satisfies all the clues given below.
- 6. Some "words" may not have clues. They will be determined by the "words" which intersect them.

Across Up Down

- ${\bf 2}\,$ Three thousand two hundred one more $\,{\bf 5}\,$ Half of 1 down, then subtract 4 across than 4 across
- 4 Ninety-seven times a prime number

- 1 Five thousand nine hundred seventy-six less than 6 up
- **3** Half of 6 up, then subtract 2 across

Solution:
