# TripleCross - Intermediate Puzzle #57

This puzzle is like a crossword, but with numbers. Each digit occupies a hexagonal cell and can be a part of a "word" in the across, up, and down directions.

Rules:
1. "Words" may not start with a zero.
2. "Words" in the 'across' direction read from left to right.
3. "Words" in the 'up' direction read along the upward diagonal to the right.
4. "Words" in the 'down' direction read along the downward diagonal to the right.
5. There is one unique solution which satisfies all the clues given below.
6. Some "words" may not have clues. They will be determined by the "words" which intersect them.

Across

2 Eighteen times a prime number
4 Thirty times a prime number
5 7 up minus 6 up

Up

5 Nine times a prime number
6 One hundred seventy-two less than 1 down
7 Seven hundred fifty-one more than 5 up

Down

1 3 down plus half of 4 across
2 Nine hundred sixty-seven less than 5 up
3 Three times a prime number

Solution:
